

Sentinel DB 360

DATABASE OBSERVABILITY

v1.7

Product Brochure · 2026

MADE IN TÜRKIYE · KVKK COMPLIANT · TURKISH SUPPORT

See Database Issues Before They Affect Operations.

SentinelDB360 — a database observability platform that lets you monitor SQL Server, PostgreSQL, MySQL and MongoDB environments from a single pane. Detects issues early, reduces downtime risk, keeps data on your own infrastructure.

SQL Server

PostgreSQL

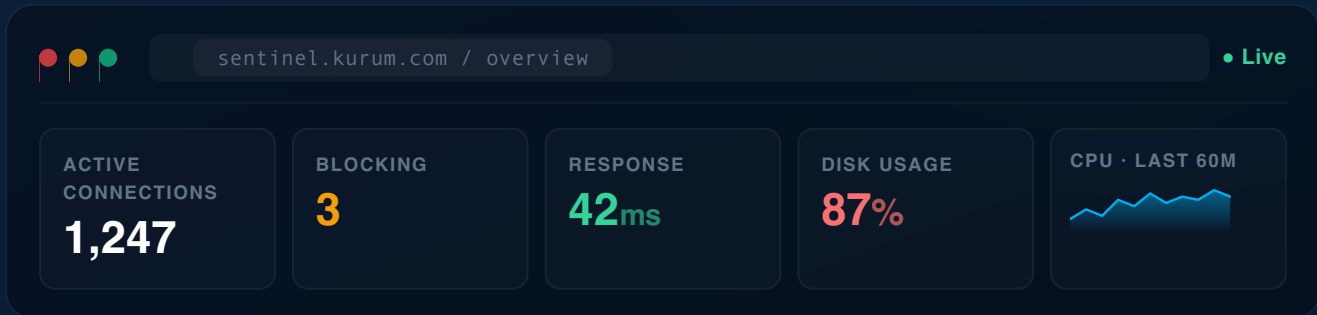

MySQL

MongoDB

14-Day Free PoC →

~30 min setup · no credit card required

v1.7 new: Folder + Versioning, Maintenance + Quick Mute, Alert dedup + cascade snooze, Dashboard JSON I/O, PG/MySQL Plan Regression, Explore Mode, Transformations, Public Snapshot + QR, Smart Statistical Baseline, RBAC Granular (19 scopes), Library Panels, Mobile drawer — **13 sprints, 126 unit tests, 0 schema migration.**

IMPACT ON OPERATIONS

See issues before they affect your operations.

Database-related problems are usually noticed only after user complaints begin. SentinelDB360 reverses this timing.

"Detected only after customer complaints started."

Slowing queries and rising resource usage go unnoticed. SentinelDB360 catches anomalies before users feel them, giving teams a window for early intervention.

"An unplanned outage stopped operations."

Disk filling up, broken replication, unexpected slowdowns — outages drag on. SentinelDB360 detects bottlenecks early and supports business continuity.

"Every audit turns into a fire drill."

Access logs, security checks and audit reports are prepared manually. SentinelDB360 delivers audit-ready infrastructure — KVKK-aligned, reports a click away.

CURRENT STATE	WITH SENTINELDB360
<ul style="list-style-type: none">● Separate tool for each database, team overhead	<ul style="list-style-type: none">● Single pane, four databases, one management point
<ul style="list-style-type: none">● Problems detected only after user complaints	<ul style="list-style-type: none">● Early warning, intervention before users feel it
<ul style="list-style-type: none">● Foreign SaaS — data residency risk, cross-border transfer	<ul style="list-style-type: none">● Data stays in your infrastructure, KVKK-compliant
<ul style="list-style-type: none">● Foreign vendors — FX-dependent budget	<ul style="list-style-type: none">● TRY pricing, predictable budget
<ul style="list-style-type: none">● Manual report prep before each audit	<ul style="list-style-type: none">● Audit log continuously collected, reports ready
<ul style="list-style-type: none">● No solution for air-gapped enterprise networks	<ul style="list-style-type: none">● Air-gap install for security-first sectors

FAST DEPLOYMENT

Three steps to set up. Low operational overhead.

SentinelDB360 installs on your own server — no source-code download, no complex configuration. Average ~30 minutes to live.

1

Run the install command

The system pulls and configures required components; operations team setup overhead is minimal.

```
curl install.sh | sudo bash
```

2

Add your databases

Define databases to monitor from the panel. SentinelDB360 connects via the credentials you provide.

Sources → Add Source

3

Monitoring active

Data flows to the dashboard within minutes. Minimal user training, quick time to value.

✓ Dashboard active

SOLUTION AREAS

Four core impacts, four tangible gains

01

Single Pane

Monitor all database environments from one screen. Visibility increases, operational complexity drops.

GAIN: Unified dashboard · One management point

02

Continuity

Anomalies and bottlenecks are detected early. Response accelerates, business continuity is supported.

GAIN: Early warning · Fast response

03

Compliance

Access records and audit processes are centralized. KVKK-aligned, audit-ready.

GAIN: Audit log · KVKK alignment

04

Planning

Resource growth trends are tracked. Investment needs are forecast in advance.

GAIN: Forecast chart · Investment foresight

FLEXIBLE PLAN OPTIONS

Three plans, one product. The right fit for your scale.

Starter

SMB — up to 10 servers

- ✓ All 4 databases (SQL Server, PostgreSQL, MySQL, MongoDB)
- ✓ Live monitoring dashboard
- ✓ Automated alert notifications
- ✓ E-mail support

MOST POPULAR

Professional

Mid-to-large — up to 50 servers

- ✓ Everything in Starter
- ✓ AI-assisted analysis (optional)
- ✓ Slack and MS Teams integration
- ✓ Excel and PDF reporting
- ✓ Immutable audit chain
- ✓ Business-hours support

Enterprise

Bank, gov, holding — unlimited

- ✓ Everything in Professional
- ✓ Single Sign-On (SSO)
- ✓ Air-gap install (offline networks)
- ✓ Multi-tenant isolation
- ✓ SLA agreement
- ✓ 24/7 priority support

Local Development

Built at Düzce Technopark.
Turkish law.

KVKK Compliant

Data stays on-prem. No
cross-border transfer.

Air-Gap Support

Runs on offline enterprise
networks.

Expert Leadership

Led by Microsoft Data
Platform MVP.
